

UTAH DEPARTMENT OF  
**HEALTH**

## **Opioid Community Dashboards – Internal and External**

Naresh Sundar Rajan  
Health Informaticist, UDOH

January 10<sup>th</sup>, 2019

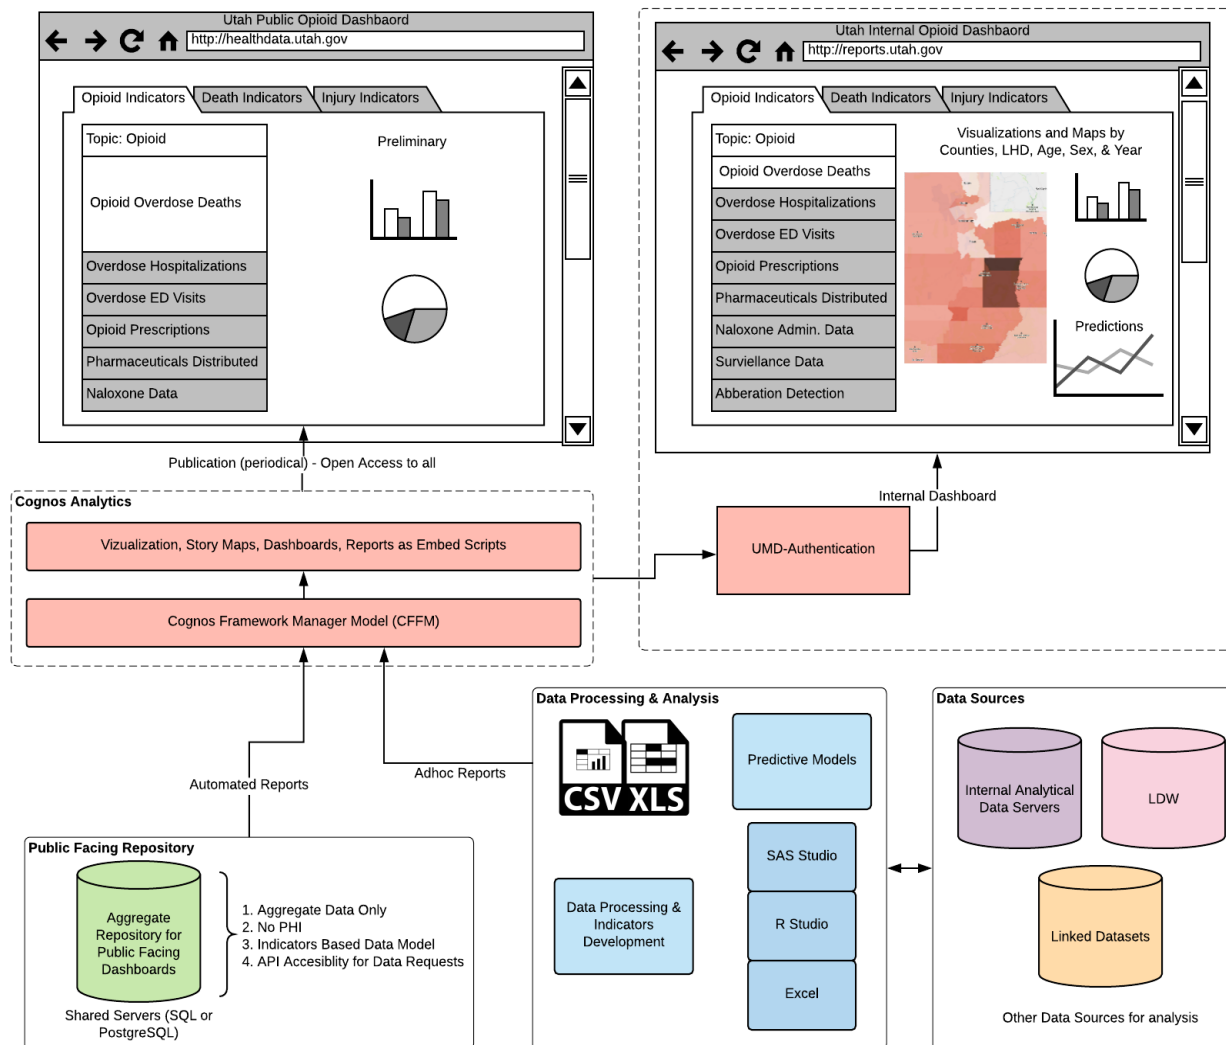

# Dashboards

Utah Public Opioid Dashboard – Provide public and key stakeholders a data tool with enhanced data visualization and integration of fatal and non-fatal opioid-related data

Internal Dashboard - Provides more features and ability to drilldown in detail with predictive analytics to Local Health Districts and other stakeholders

# Informatics Architecture

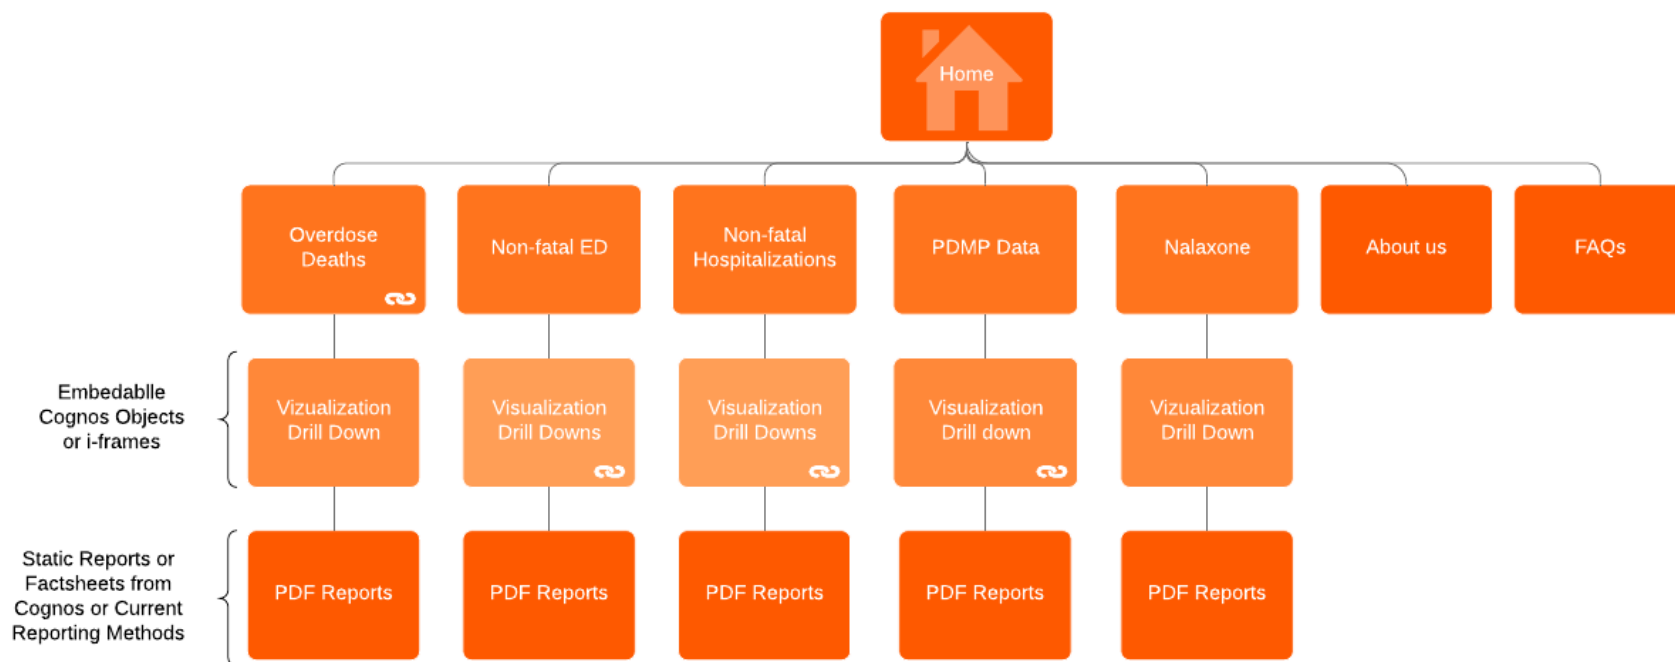

# UPOD – Site Map

Utah Public Opioid Dashboard - Site Map

Naresh Sundar Rajan | January 10, 2019

# Current Status

- Survey methods to get the following:
  - Importance of an indicator
  - Usefulness of an indicator
  - Complexity of an indicator
- Will be sent to:
  - Health Educators
  - Public Information Officers
  - Epidemiologists
  - Health Officers
  - Health Program Managers
- Next steps:
  - Finalize indicators
  - Review data sharing agreements
  - Work with CHDI & DCP-IP on hosting & Web-page designing
  - Go-live by Summer-2019

Welcome to the Utah Public Opioid Dashboard (UPOD) Survey!

## Utah Public Opioid Dashboard

Many states have developed interactive opioid dashboards for all statewide data related to opioid use, misuse, and overdose deaths. The goal of Utah's Public Opioid Dashboard is to provide the public and key stakeholders a data tool with enhanced data visualization and integration of fatal and non-fatal opioid-related data.

## Intended Users

The intended users are the general public, local health departments, media, community-based organizations, syringe exchange programs, overdose outreach providers, legislators, and individuals and organizations interested in Utah's opioid epidemic. The dashboard will enable the surveillance of short and long-term goals and will provide the most current public data available.

## Purpose of Survey

The purpose of this survey is to collect feedback from Local Health Districts regarding common opioid-related indicators that will be displayed on a public dashboard.

Indicator Name	Opioid overdose deaths
Definition	Deaths with an opioid listed in the cause of death
Broken Out By	Type of Drug (Prescription / Heroin)

How important is this indicator to be displayed on a public-facing dashboard?

Very Important	Important	Moderately Important	Slightly Important	Not Important
----------------	-----------	----------------------	--------------------	---------------

Do you agree that this indicator will be useful on a public-facing dashboard?

Strongly Agree	Agree	Undecided	Disagree	Strongly Disagree
----------------	-------	-----------	----------	-------------------

How would you rate the difficulty in understanding this indicator on a public-facing dashboard?

Very easy	Moderately easy	Neither easy nor difficult	Moderately difficult	Very difficult
-----------	-----------------	----------------------------	----------------------	----------------

How would you use this indicator?
